4/1/70

Dear Bud,

I've been in touch with Shea. He lived in N.O., was in Japan, may be rational, suggests he knows people who knew Shaw(of whom there must be thousands, of whom some are my friends), and he strings out a series of coincidences the significance of which is not immediately apparent.

He seems to have written you once I started asking him questions, seeking evidence of meaning in what he wrote.

Unless he comes up with something that makes sense, I have no further interest in him.

If I get anything I'll let you know. I suggest that if he is not rational or if he is up to somethingo it would be better for you to ignore him. If there is any reason he cannot or will not answer the questions I've asked, there has to be something wrong.

You are welcome to see my file.

Sincerely,
